Spring Style 2023

By [Sharbat Talib](#) April 16th

Spring is once again here which, you guessed it, means [more spring advice](#) for all my Cuties out there!

Today I have 4 easy styling tips to get you going:

1) Rock some light weight layers!

Fun fact did you know that the weight of a fabric affects how toasty it is more than the color? This year change things up with multiple skirts for flair, a long-sleeve short-sleeve combo, or simply play around with any rompers and scarves laying around.

2) Pick fragrances for some added flair.

Picking a specific scent is a great way to further express what you're feeling that day. Floral scents are great for when you feel cute, while pine or bourbon provide a more mature appeal.

3) Carry lip balms with SPF protection.

Seriously, if you've never used a balm with SPF protection, try it out! As things warm up it is going to change your life and your lips.

4) Be confident and have fun!!!

While it may be a bit copy-paste to have a dedicated section on confidence, it's worth reminding ourselves that self-worth comes from within. So go out with a little self-love Cuties!

DAVE BASAE

FASHION SHOW

Fashion is not only competitive among dwellers of the deep, it is often a contest for survival. We will be taking a glipse at just a few of these ornate ocean denizens and comparing their stylistic distinctions...

OCTOPUS

Octopuses and cuttlefish comprise two different orders of class Cephalopoda both known for their ability to transform the coloration and textures of their skin...

VS

CUTTLEFISH

Certain types of cells such as *chromatophores* control the pigmentation while *papillae* allow the skin to morph its very shape. Octopuses can go a step further to reshape their entire body, having no stiff internal structures, while cuttlefish have been known to *hypnotize* prey with their flashing color patterns.

HERMIT CRAB

VS

Hermit crabs take their pick of shells no longer in use to call their very own and may even wear flowery anemones for extra protection against attackers.

DECORATOR CRAB

Also known for expressing unique styles, decorator crabs will attach bits of organic material to their bodies to form their own customized clothing.

SLUGS VS WORMS

Nudibranchs, often called sea slugs, come in approximately 3000 varieties and are avowed by some to be among the most beautiful creatures in the ocean. Their vibrant colors can be enhanced by their own choice of meal.

Christmas tree worms are notably fashionable Annelids known for building tubes into the coral, from which their two spiral-shaped “gills” protrude. Designed for respiration as well as catching food, they curiously resemble twin Christmas trees and come in an ample array of colors as well.
